Again, if we examine into the Earth to a little distance, wherever there is a cold climate, tropical plants are found. Captain PARRY found them in some of the coldest regions of the Earth. There was, therefore, a time when they once exsted upon the surface, and the temperature must thun have been warmer.

To be sure Mr. LYELL controverts this method of explaining it, for he contends that this change of temperature is owing to a change in the condition of the Earth's surface, as in the periods of its submergence it would have been warmer. That any change of this kind, sufficient to account for these facts, could have occurred, he said, it is impossible to suppose: there must at all events have been a most material change in elevation. There can be no doubt that the temperature of the Earth has undergone a change. Shells show the same thing, and LAPLACE has demonstrated that this great change cannot be attributed to a change of axis, as I once thought it might. I mentioned this theory, which I originated, to Dr. MITCHELL, and he did the honor to adopt the theory, though he forgot so acknowledge its parentage; for he repeated it

or ms cress soon area. And said not one work is author. This, however, was soon found to be of little consequence. These arguments put beyond all reasonable doubt the main fact I have stated—that the Earth was once a fluid. Some sixted—that the Earth was once a fluid. Some of the Federal Republic. The oredited America being restored, and our Corn Laws placed on the proper footing, and the two countries may begin together a long career of prosperity. to gravitate, have not gone to the centre? And nother objection is, that the materials composing desurface of the Earth are far more numerous than at the centre: the surface is most complexsfact directly contrary to the theory of fluidity. Both these objections can be got over by this supposition there is some reason to believe that netals are no simple bodies; for where mines have been shut up, metals have been found to ferm upon the surface; and they do not therefore exist at the interior - not being simple bodies. Persons. lowever, could attach to these objections such force as they chose.

The fact of the Earth having been in a state of fusion being once established, we are to argue from it, and not to it. It leads, first, to the conclusion that the temperature of the surface of the Earth has gradually changed. Dr S. said he held it to be a self-evident principle that in a system of bodies where chemical action was supposed to prevail, the most intense action would occur first. the minor next, and so on in succession. This preposition is fatal to the cardinal proposition of De LYELL, who contends that the causes which modify the character of the globe now are the same as those which formerly existed. This is disproved by the principle just stated, and also, as Dr. S. contended, by facts, as well as reason. Granite lies at the bottom of the earth's strata,

but is some places it has been thrown up; and upon our own Battery gneiss may be found to have thus cropped out. The granite is often found contorted in the strangest ways. A column of lava explain how beds of coal and other strata are found oftentimes tilted over. This is effected by the upheaving force already mentioned. Granite sometimes found directly beneath the tertiary Amation-out of place, as will be seen at once; but this is readily explained. Sienite, too, is often found just above the primary rocks. The great disturbance to which the earth has been subjected his thus produced great changes in the position of the strata. The cooling of the granite must have been an exceedingly slow process, because, first, the heat must be thrown off into empty space, every particle of matter being equally heated with every other; and in the volcano of Truxillo, 150 years after the eruption, the lava was still uncooled -so slowly does this rock lose its heat. Another fact shows the same thing. Ice, which is a necessary article there, once failed in Sicily, from the mildness of the winter; and a philosopher there who had studied the constitution of Mt. Etna dug beneath the upper crust of lava and found ice there embedded, strange as it may appear. Ashes had overed the ice, and lava the ashes. Flow long the fee had been there of course no one knew; but there was no appearance of its having melted at ail. From this, said Dr. S., I conclude that upon accasions philosophers are of use. The world oftentimes at ems to be of the opinion of the woman the nursed D'ALEMBERT: she abused him for not making money-"Of what use are you?" said the; "I believe you are fit for nothing but a phiisopher." Still a philosopher may sometimes be fuse, as this fact shows. One of the wise men of Greece was once asked of what use his knowedge was, since he did not make money by it. To chaute him the wise man entered into what would now be called a speculation, and showed that he ould make money if he would. To the writings of Locke, philosopher as he was, the nations of the world are indebted for much of the liberty they

To return to Geology: When the granite began to cool, there was first a thin crust; and we are bound to believe that the play of chemical affinity was then most intense. We can then well magine that these strata should have been turned upside down, though Dr. S. said he could not explain how they returned to their first position. It s plain that, by severe pressure upon the top and upon the sides, we should have strata of a particular form, and easily understood.

In examining the strata of the earth, we often and what are called faults-that is, one part of the strata falls below another, or is raised above it to matter which. This is the arrangement which has given the island of Great Britain such advanages in many respects. Veins in Geology are small masses of one kind of matter which have been projected through another. Large veins are called dykes. We may often see in our streets quartz thus projected through granite.

Thus the crust of the Earth, now so firm, has attained its present position by changes and disturbance In this country there has been very little disturbance; our strata are very nearly horiloatal; and it is on this account that our canals are so successfully constructed. With these remarks Dr. S. concluded his Lecture last evening.

AN AMERICAN SHIP DESTROYED BY FIRE. The Bordeaux journals give an account of the toal destruction by fire of the American ship Havre, of 430 tons, Capt. McKowen, lately arrived in that port from New-Orleans, and intending to return mediately in ballast. It appears that the flames broke out at two o'clock in the morning. At 12 "clock in the day the foremast fell into the river, and was soon followed by the others. At 3 o'clock the vessel was still burning, and formed a spectacle which attracted thousands of beholders. At 6 e clock her remains were completely submerged that the crew had got drunk and set fire to the ship in four places at once, and afterward abandened her, carrying with them all that they could lay hands on. Three negroes belonging to the Havre have been taken into custody.

FRENCH LANGUAGE,-The system for teaching Languages discovered by the late JOHN MANESCA is undoubtedly the best, most philosophical and at the same time the trues! to Nature that has been discovered. Manesca was for more than twenty years engaged in teaching the French language, and he was occupied during that entire time in devising and perfecting his system. Learning by rote from Grammars and Dictionaries, which is the most disagreeable of tasks, is entirely obviated, and a natural and practical method is substituted in the place. We can particularly recommend the system to persons who are desirous of acquiring the French, and as instruction from a teacher who understands perfectly the use of it, is necessary to success, we will state for their advantage that the system is conthaped by a talented member of the family at their resi-

The powerful attractions at the New York Museum draw crowded houses. The Hughes family display their tronsferful antities on the Harp, Violin, and Concertina. They discourse most eloquent music. Commercial and Reney Matters.

The sales at the Brokers' Board to-day were very small Delaware declined I per cent, Mohawk i per cent. There was no change in State securities and the transactions were

The Manhattan Fire Insurance Company has declared

dividend of six per cent., payable on the 1st inst. Private letters by the Acadia state that money was perfect drug in London; the amount seeking investment is larger than was ever before known. Loans on call, on security of Stock, bad been made as low as I per cent There was a somewhat better feeling growing up in relation to American Securities, in consequence of the general condemnation the doctrine of repudiation meets with on this side of the water. The London Morning Chronicle says:

"It is stated in the accounts lately received from the U States, that men of all parties and classes are beginning to occupy themselves seriously in the consideration of plans for restoring State credit, as the best means of restoring

Ireland for the purpose of settling in this country, and that

Father Matthew has recommended Illinois, in consequence of the disposition of that State to do what she can toward paying the interest on her debt. An extensive house, Hunter & Coventry, has failed in

Numerous other heavy failures have occurred and the distrust with which, the "Corn paper" is now regarded by the Bankers and the discount houses, with the consequent difficulty of its negotiation, has had the effect of bringing to the ground a number of firms who, for a long series of years, have maintained an induential position

Among those who have been competed to suspend pay-ments are Erastus M. Foster, Heimeley, Brothers & Evans, Foster & Langton, of London, with many of equal import-ance in Liverpool, Manchester, Glasgow and Stockport, while on the continet J. H. Wichman of Stettin; Archae & Co., Rey Brothers, A. Guizot & Co., and six other ficus at Marseilles; with others in Paris, Amsterdam, Nantes and The following letter conveys interesting information upo

he state of the Money Market Correspondence of the Tribune.

There has been no return of confidence, but, on the con trary, credit was perhaps never bulore at a lower ebb; a state of things, no doubt traceable to the more complete developement, recently, of the evils consequent upon the working of a vicious system of Banking, which has resulted in a sacrifice of capital beyond any thing which could have been imagined; to losses in the Corn Trade, amounting to two and a half millions; and to failures in almost every di rection, the effects of all which could not be otherwise than paralyzing. In the manufacturing districts also, no sooner have the difficulties with the operatives been adjusted than a Tariff comes from America adverse to the industrial in terests of this country, affecting the Laneashire and Yorkshire districts more particularly, whilst the Linn Trade is suffering in an equal degree from the operation of the French Tariff; and prices of manufactures are forced down to the very lowest point of July. Thus it would appear that, at dislocates the strata of the earth-and this will the time this country is endeavoring to introduce a reci procity of commerce upon a principle of free trade, other countries are pursuing the very opposite course; for, within the last twelve months, there have been no less than six hostile Tariffs. At the same time complaints are heard from many parts of the agricultural as well as from the manufacturing districts, of a diminished demand for labor, which may be ascribed partly to a number of hands who were engaged upon the various lines of Raiiroad new completed, being thrown upon their own resources, and having to seek other employment; and partly from the less time and labor required to secure the late abundant harvest; nor will the important results to be an icipated from a moderate price of food, supply the immediate want of wages; nevertheless it is satisfactory to observe that meat can be bought in the metropolitan markets at 38s. per cwt., which in July cost 50s., and that good free Foreign Wheat is selling at 42s, per quarter.

The return of the Revenue as given for the last quarter has had a depressing influence, although the falling off should be ascribed in a great degree to the interruption of the receipts by the non-ratification of the Portuguese treaty for the reduction of duty on Wine from 5s. 6d. a 3s. per gallon; but for this contingency, there would no doubt hav been a considerable augmentation arising from the increased consumption of Sugar, Tea, Tobacco, &c.

The plethora of money, so far from abating, become up by Bankers and other capitalists in Lombard-street, which cannot be loaned on good security at any rate of interest whatever. This is the more remarkable from occurring at a season when the engagements of individuals are at the heaviest amount, and discounts should be required upon a scale in proportion. The transactions on the Stock Exchange are daily becoming more and more insignificant and on the different walks of the Exchanges the aspect of affairs is not cheering, more particularly as applicable to

hours of Agency. The Bank have now received seven and a half million light Sovereigns, and the Exchange is still going on at th rate of about two hundred thousand weekly. This arrangement, considering how injuriously the currency was affected for so many years by the circulation of so much defective coin, must be deemed a most important regulation in monetary affairs, and for carrying it through, the greatest possible credit is due to the Bank and the Government, nore especially as, at the commencement, the unpopularity

f the measure was very great. Notwithstanding this generally unfavorable statement of ousiness throughout the country, it is satisfactory to learn that in some of the great branches of internal trade more confidence prevails, accounts are better paid, and much fewer complaints are heard; which leads many to anticipate a more healthy state of things on the approach of Spring; and it is not a little remarkable the Timber trade already exhibits considerable activity, and contrary to the anticipation of the dealers, who were at one time bewailing the possession of large Stocks, they are sustaining whatever the price to the consumer remaining the same, so that the late great reduction in the duty on Deals hasstill more gone to benefit those engaged in the foreign and Canadian Tim ber Trades.

Markets - Carefully reported for The Tribune. FRIDAY, Nov. 18. ASHES-By the Acadia we have advices to the 4th inst The demand for Ashes at Liverpool had been good during the month at gradually improving rates, Pots having realized an advance of 1s and Pearls 2s a 2s 6d per cwt., but the export orders being apparently completed, the market was more qu'et. 200 to 300 bbls, were reported to have been sold, to arrive, but the price not allowed to transpire. Canada Pots 28s 6d a 23s; Pearls 29s 6d a 30s. No United States in market. The sales here to-day are about 100 bbls. Pots

at 5 25. We hear of no sales Pearls.

COTTON-By the Acadia we learn that there had been ome speculative feeling at Liverpool, during which, middling qualities advanced 4d, but that the speculative feeling having subsided the market had relapsed into a languing state, and the advance had been lost. The business for the week ending 28th ult. was 28,860 bales, of which 10,000 bales were on speculation. Of the sales 4510 were Upland at 3; a 5; 9470 New-Orleans at 4d a 7d, with 20 bales fancy, new crop, at 8d; 4890 Mobile and Alabama at 4 a 61d. The business for the five days ending 3d, was 18,000 bales, of which 5000 bales were on speculation. It is supposed that low prices and the prospect of a short American crop suggested the speculative purchases. If the latter respect there will be disappointment. The imports into Liverpool since 1st January were 1,078,000 bales against 1,055,000 last year. The supply from the United States is 841,000, an increase of 47,000. Stock, 490,000 against 479,000 last year. American, 298,000, or \$3,000 less than last year. At Havre business was by the flood tide. Reports were in circulation in a healthy state, and an advance of 1f on ordinary and middling descriptions had been obtained. The sales for the last week in Oct. were 10,101 bales. The stock was 130,000, of which 121,000 were American, against 110,000 last year. On the 1st and 2d inst., the demand was rather limited, but the market steady. In this market there has as yet been no perceptible effect from these advices. The sales are about 500 bales, mostly to exporters, at previous prices. The sales yesterday reached 200 bales. We quote fair Upland 7% a 7%, which is a shade lower; fair New-Or-

cans and Alabama 84 a 84. FLOUR-The Corn marke's in England were in rather a better position. The importations had not been large and the stocks had been reduced, the stock of free Flour being estimated at not over 50,000 bbls. Prime Western Canai held at 27s 61 a 28s; other descriptions United States at 26s 6d a 27s, Canada 25s fid a 26s fid, which are rather better rates. At London there had been very little improvement. Flour was dull at 25s a 27s free, 20s a 22s, in bond. Good red Wheat 45s to 48s per quarter. The duty has advanced to 19s per quarter. Here the market remains very much as quoted yesterday; the supplies are very light and the demand moderate. We quote Genesse 4 311, Ohio and Michigan 4 25 a 4 314; Troy, with sales 700 bbls, at 4 314, for fancy. There is some difficulty in finding Ohio or Michigan at 4.25. In Southern descriptions there are only small ales Georgetown at 450, and Brandywine at 475. Last

for Jersey, 2 874 a \$3 for Brandywine; bbls. 13 25, cash 13 75. 4 mos. for bhes.

lots, comprising 2500 bushels Illinois. Lave been taken for milling, supposed at 374 cents. A portion of it was very prime. Several other samples were offered without finding buyert. Cora remains dull. Sales 1000 bushels new North River at 45 cents, weight, delivered; 1000 do. New-Jersey new at 47, weight; 1500 do. Ohio Canal, at 52 a 53, measure and a small lot of Jersey White at 50, measure. The market has again been nearly cleared of Barley. About 5000 40 cents. Distillers only offer 66 cents to-day for Rye. In addition to the amount we have reported 4000 bushels were sold on Wednesday, supposed at 70 cents. There is a fair business doing in Oats at 26 a 28, mostly at 27 a 27]. Shorts 6 a 7-very scarce. Ship Stuffs 10 a 11.

HOPS At Havre there was no demand for consumption. Here the demand has been better to-day and several lots have been sold at 11c for Western, and 10 cents for Eastern. small sales have been made lower than these rates.

TEAS-A catalogue of Teas was offered to-day. The good Teas brought high prices. Nearly all the Young Hyton was withdrawn. A large proportion was Macao trash of which only two lots we e sold, at 14 a 15c. Country Y Hysons brought 67 a 50, 441 a 371; Hyson 60 a 51, boxes 51c Hyson Skin 54 a 31; Gunpowder 40 a 29; Southong 22c.

SANDS'S SARSAPARILLA. - The contemplation and study o the solar system, emorating the planetary world, is one of the most sublime that can engage the speculation of the philosopher, the attention of the sage or enrich the understanding of mankind. We here behold the power of Om-nipotence spreading through infinite space for the happi-ness of an uni mitted number of created beings. The man who first discovered and made known to the world the laws that govern the universe, was pronounced as enemy to his more branded as a heretic. Thus it is that ignorance race, and branded as a heretic, the state is might be more discharged for a time, but Truth is mightly

nas conferred a bose on the bund. If the SARBS I wanter a state is the hard by thousands with encounter of designt, suffering with Rhomatism. Seroida, Mercurial diseases, obstinate cotaneous eropuons, white swelling and other affections taying their origin in an impure or unhealthy state of the blood, the only sure remedy for the removal and permanent core of such obstinate maladies. Those who read forther its G what it has done will please to observe what it can do, and the affected have only to make a trial to be convinced.

Proport and sold at whomesale and rotal, and for proport-

Tr Read the following Remarkable Cure performed by

NEW-YORK, Oct. 29, 1842. Mr. C. C. Bristol—Sir: The motive that prompts me to address these lines to you, arises from a conviction paramount to that of mere praise of your valgable Sarsaparlila, or if that was my desire I should tail in the attempt, for I feel as though it would require a more powerful pen than mine to do justice to the high clasms of so valuable a medi-

cine as Brittol's Sarsaparilla.

It is the obligation I owe as one of the vast family of that to those, like myself, whose misfortune it has been to be afflicted as I have been for several years past, that induces me, without solicitation, to make known to the world what has been an effectual remedy when and where the

what has been an effectual remedy when and where the hope of a cure was shoost extinct.

I had been informed that you were to visit this city this fall, when I expected to have the pleasure of stating to you what your Sarsaparilla has done for me, but in this I was disappointed, you having left the city before I knew it; I have therefore taken this method to inform you, and through you, all who may desire to know what my afflictions were and also what has proved an antidote to the same.

I was attacked with Scrofula in a very alarming form about five years since, which spread rapidly throughout my head, face and throat, internal and external; there were several holes in the roof of my mouth and about the palate, several holes in the roof of my mouth and about the palate, which was nearly destroyed—my speech and hearing so much affected as to leave but little hope that those senses would ever return to me again as they now are. One of my ears was partly destroyed, my noce and the greater art of my face to all human appearance must meet the

of rest or sleep that was any thing like natural, but as one renzied I passed my sleepless nights and wearlsome days. If lower extremities were deathly cold and inanimate.—

Hy feet were greatly extended in size from what was called osy, and in addition to this, for many years I was af-d with Piles in their most severe and distressing form, which is no v removed, together with most of my great affictions, through the use of your Sarsaparilla alone, after having the best medical treatment the city afforded. I am now nearly well-my face has been saved, my month and throat heated, my speech and hearing restored, my sight improved, which was very doubtful, my sleep become natural and my appetite good; in a word, I am a different person in Geing and appearance, and there remains not a doubt but that Bristol's Sarsaparilla will effectually accomplish a thorough and lasting cure of all my afflictions. I lam at a loss for language and terms strong enough to speak of your Sarsaparilla as it deserves. It has been to every thing-to it I owe the preservation of my life un-

der the direction of a wise Providence, and were a capacite I would proclaim te all the world what Bristol's Sarsapari la bas done for me. It will afford me pleasure at any time to inform any person who may desire to know any thing I know of Bristol Sarsaparilla.

Yours respectfully, OPHELIA GORDON.

No. 10 Orange street. No. 10 Orangestreet.
N. B. I called at the office of the Sue paper this afternoon and requested the publication of the above letter for unon and requested the publication of the above letter for one week, and was refused by the person in charge of the office, who stated that the letter could not be published in the Sun, as others had the preference in such advertisements. Lenquired the cause of so strange treatment, I having been a subscriber for the Sun from the first number to the present time; believing, as I did, that I was entitled to the same privilege with others in giving publicity to that which I considered to be my dutyto the community, as well as of great importance to the afflicted, that they might know what to apply as as afe and sure remedy. But I was told that my letter could not go in the Sun at any rate. I was also told that if I would wan three months they might put it in the Sun for me. I then left the office.

15 61

Il Fire at the Tombs. - GREAT EXCITE MENT.-Never was such a scene witnessed as that exhib ited in and about the Egyptian Tombs yesterday afternoon and evening. Death in the most horrible form was the theme of discussion, and thousands of anxious people thronged the streets. And yet no greater sensation has been produced within the last half century than that occa-

sioned by the remarkable cures effected by DR. RUSH'S INFALLIBLE HEALTH PILLS, the best medicine ever prepared for the cure of Dyspensia or Indigestion, Bilions and Liver Complaints, Headache, Heartburn, Eruptions of the Skin, Piles, and which are in valuable in the numerous complaints to which women are subject. This valuable medicine is the result of many years of careful study and experiment, on the part of the late Dr. Benjamin Rush, of Philadelphia, one of the most skilful physicians of the age. The Pills are exceedingly mild in their operation, giving no pain whatever; and by a happy combination of medical agents, they are enabled to carry off all the vitiated and irritating secretions from the alimentary canal and remove any inflammatory or other derangement of the animal sconomy which may have been induced, equalize the circulation, restore a healthy action to all the secretory organs, and promote a most vigorous action of the organic functions.

sales New-Orleans at 425, Richmond City 575, Richmond Country, Petersburg and Alexandria 431½ a 437½. Rye Flour and Meal are without shange. The former sells as it arrives at \$150.000. it arrives, at \$121 a 3 25. The latter is dull at 2 69 a 2 75 retail at 432 Broadway.

The practice of many physicians is to administer tonic medicines in cases of inflammation of the Lungs, Windpipe, Pleura, &c. This course of treatment is perfectly unphilo-sophical, and allogether dangerous; also many of the no-trums put up avowedly for the cure of such diseases contain more or less opium, as well as tonic exercicines. Now opium quiets pain and hides disease, but does not remove the cause. The only true method of treatment is to give despeting medicine. Dr. Covert's Balm of Life is a pure expectorant—it depletes the system, causes a free expectorant—it depletes the system, causes a free expectorant—and administers, second and administers. tion, and administers speedy relief to the patient. This medicine for Coughs, Colds, Consumption, Brouchitis or Screthroat, Dyspepsia, Ashima, Croop, Whooping Cough, &c. is perhaus the most certain medicine of any that can be given. The Doctor's Office for the sale of Covert's Balm of given. Beport No. 5 of Dr. Thomson's Practice, 348 Broome-street.—RHEUMATISM.—New-York, Nov. 18th, 1842.—This may certify that I was attacked last May with the Chronic Rheumatism in my left hip, from which place it has traversed backward and forward to my knee and ankle during the season. The variety of remedies which I have used have done me no good, my business be which I have used have done me no good, my business be ing of such a nature (a ship carpenter, and having frequently large numbers of men at work) as to require my con-stant presence. With difficulty I kept about until yester-day, when, being at White Hall Slip, the distress increased to that degree that it became intolerable. I felt as if I was being unjointed. I got into a Bowery omibus and drove le Dr. Thomson's, 343 Broome-street; and now, 24 hour-after. I feel entirely rulieved, and feel well rewarded for the time spent under his judicious treatment. I am better than I have been since I was first attacked in May. I feel strong and well, have a good appetite, and would advise than I have been since I was that status in a status strong and well, have a good appetite, and would advise all who have the Rheumatism, and want quick reflef, to call upon Dr. Thomson. Yesterday I walked with difficulty with a cane; to-day I can walk better without one, and consequently have left my cane with the Doctor, where it to the property of the property JOSEPH JONES, 113 Henry-SL may be seen.

I Bhenmatism! Rhenmatism!-The only medicine yet discovered which can be relied on for the cure of this painful disease is Dr. HENRY'S VEGETABLE RHEUMATIC SYRUP. Here is another certific vegetable RHEUMATIC SYRUP. ceived last Friday:

New York, Nov. 10th, 1842

Dear Sir: For the advantage of all who wish to find a medicine that can be relied upon for the cure of Rheumanism, I would state that Dr. Henry's Rheumanic Syrup has cured me after every other medicine had failed. I had been afflicted with the Rheumanism in my feet and ancles for the space of six months, so that I could not walk across the fhour without suffering the most excruciating agony. I made use of every remedy which I could hear of independent of my physicians, prescriptors, without avail. I continued to Having read in the newspapers of the cures performed by the use of your specific, my husband procured a bottle for me, and before I had made use of baif of u, I found myself me, and before I had made use of baif of u, I found myself pletely cured. Mrs. H. DEMAREST, 75 Elizabeth-st. For sale at No. 296 Bewery, corner of Hunston-street; also at Sinclair's, No. 100 Nassau street, and in Newark at Trippe's, No. 298 Broad-st

SALES OF STOCKS AT PUBLIC AUCTION.

ALBA KIMBALL offers his services to Merchants and others for the sale of Stocks at Public Auction.

For the accommodation of dealers, he will hold daily a gubic sale of such Stocks as are offered, in the Rotunda of the Merchants' Exchange, where boyers and sellers being present, can regulate their transactions satisfactorily to themselves.

themselves.

The publicity of these rales will obviate the frequent control of the properties and law suits which arise under the present system; being subject to the same rules of business as Merhants' sales, and open to inspection, where every person an exercise his own judgement.

Principals will have the liberty, whenever they so elect, to make the transfers direct to the purchaser, and receive inspections.

proceeds.

Dealers will derive another important advantage through be medium of the Auctioneer's advertisements, as Stocks are frequently sold at the Board of Brokers at a less price an could have been obtained, had they been advertised id the sale made public.
